Professor: Thomas Hayes

README

To run this program it requires command line arguments that is triggered by a -f flag.

therefore when you run the program, it must be run with command line arguments.

an example is seen here

-f Maze1.txt

this will run the program with the input in Maze1.txt.

if you choose to run the program via command line arguments you can do so by running the program then entering your maze in manually.

Thank you.
